

ANIMASHAUN FISAYO M.

FRONTEND DEVELOPER | REACT, JAVASCRIPT, TYPESCRIPT | 2 YEARS EXPERIENCE

08052399682 | LAGOS, NG | FISAYO.ANIMASHAUN@OUTLOOK.COM | FMANIMASHAUN.GITHUB.IO

Professional Summary

Frontend Developer with 2 years of hands-on experience, specializing in React, JavaScript, and TypeScript. Proficient in creating responsive, user-centric interfaces and optimizing web applications for performance and scalability. Leverages additional knowledge in backend technologies (Node.js, Ruby on Rails) and cloud computing (AWS) to contribute to full-stack solutions when needed. Brings a unique problem-solving perspective from a background in Facilities Management, enhancing ability to translate complex operational needs into efficient web applications. Demonstrates strong project management skills and rapidly adapts to new technologies. Experienced in collaborative environments with excellent communication skills honed through cross-functional team leadership. Eager to apply technical expertise and multifaceted background to drive innovation in frontend development.

Experience

MAX-MIGOLD LIMITED, LAGOS

Tech Advisor/Frontend Developer | Jan 2022 – Present

- Led the entire full-stack development for internal software solutions, with a primary focus on frontend technologies
- Spearheaded frontend development using React, JavaScript, and SASS/SCSS, creating responsive and intuitive user interfaces
- Deployed and managed an open-source Moodle LMS on AWS, optimizing performance and load times by leveraging cloud scalability
- Implemented responsive design principles and modern SASS techniques to ensure cross-device compatibility
- Integrated RESTful APIs and implemented state management using Redux for efficient data flow
- Utilized AWS services (e.g., EC2, S3, RDS) to ensure optimal performance and scalability of web applications
- Collaborated with UX/UI designers to improve user experience and implement design systems
- Contributed to backend development using Node.js and Ruby on Rails, gaining full-stack proficiency
- Implemented GitHub Actions for enforcing coding styles and automated testing, ensuring high code quality
- Conducted code reviews and mentored junior developers, promoting best practices and code quality

JOYMATCHER LIMITED

Full-stack developer (Freelance) | April 2024 – Present

- Developing a professional matchmaking platform, implementing both frontend (React, JavaScript) and backend (Ruby on Rails) solutions
- Utilizing Redux Toolkit for state management and Redux Toolkit Query for efficient API integration, ensuring optimal frontend performance and data flow
- Implementing responsive UI components with SASS, while using PropTypes for type checking to enhance code reliability
- Designing RESTful APIs and managing PostgreSQL database for robust backend functionality
- Implementing user authentication, authorization, error handling, and logging across the full stack
- Utilizing GitHub Actions for automated testing and code quality checks, maintaining high development standards
- Collaborating with stakeholders to refine features and plan future enhancements, including TypeScript migration post-MVP

MICROVERSE INC

Full-Stack Developer (Trainee)| September 2022 – February 2024

- Completed an intensive full-stack engineering program, focusing on both frontend and backend technologies
- Developed and deployed 15+ web applications using React, JavaScript, HTML5, and Sass
- Gained proficiency in backend development with Ruby on Rails and database management using PostgreSQL
- Collaborated in pair programming sessions, simulating real-world remote work environments
- Implemented responsive designs and ensured cross-browser compatibility for various projects
- Utilized version control with Git and GitHub, participating in code reviews and maintaining collaborative codebases
- Practiced agile methodologies, including daily stand-ups, sprint planning, and project management with Kanban boards

Education

MICROVERSE

Remote | Full-Stack Web Development Program

- Intensive 1500+ hour program mastering algorithms, data structures, and full-stack development
- Technologies covered: JavaScript, React, Ruby, Ruby on Rails, HTML5, Sass
- Practiced pair programming, remote collaboration, and agile methodologies

COVENANT UNIVERSITY

Ota, Ogun State | Master of Engineering - Mechanical Engineering

- Focused on Industrial and Manufacturing Engineering
- Thesis: Developing a Simplified Computerized Maintenance Management System (CMMS) for Facility Management Operations

NATIONAL POWER TRAINING INSTITUTE OF NIGERIA (NAPTIN)

Nigeria | PGD - Operation and Maintenance of Thermal Power Plant

- Sponsored by Guinness Nigeria PLC Graduate Scholarship Program
- Hands-on training in power plant operations and maintenance

OBAFEMI AWOLOWO UNIVERSITY

Ile-Ife, Osun State | B.Sc.- Mechanical Engineering

- Thesis: Redesign of Obafemi Awolowo University Central Library's Mechanical Services, focusing on the Plumbing System and Estimation of Cooling Load using Building Information Modelling.

Communication

Excellent communication skills enable me to collaborate with clients, stakeholders, and cross-functional teams to deliver high-quality results.

Leadership

Mentor junior developers, coordinate project tasks, and implement best practices to ensure timely delivery of high-quality web applications.
